Helicopter pilot for a day

1 Pers. - Heli	1250.00 EUR
1 Pers. - Heli u. Flugzeug	999.00 EUR

Who would not want to be a pilot? Realize your hobby or taste of your dream career and become a helicopter pilot for a day. Experience the fascination of flying yourself as a full-day experience. Besides, you will gain insight into the helicopter flying and in the profession of helicopter pilots.

The day begins just after the welcome by your flight instructor with a theoretical introduction to the operation and control of a helicopter (about 1.5 h).

This is followed by 20 minutes in flight briefing with your instructor. They are used to control the helicopter itself. Then plan with the help of your instructor a 60 minute flight in which you specify a route to specified landmarks. You will be made familiar with and learn the basic concepts of meteorology and navigation, which must be considered when a flight operations.

After a snack in the restaurant of the airport hotel fly the prepared flight with your instructor. You will not only enjoy the flight, but also the sense of achievement you navigate through the air. You will end up outside the airfield in open terrain. The helicopter makes it possible!

Finally you will receive as a reminder a training video "Fly the Robinson R22" and an A4 photo that shows you as pilot by helicopter.

Location Großbrembach -price € 690.-
Helicopter & Airplane each 30 min. Flight

Monday to Friday bookings (Mo-SA flyable), times are pure flight time (turn on/off the motor).

Expiration:

- 10:00 clock welcome in the hangar in Großbrembach

- Part Helicopter
- 12:00 Lunch at the airfield Sommerda
- Part airplane
- De-briefing

XXXXXXXXXXXXXX

Who would not always want to be a pilot? Here, wishes come true. With this experience of the extra class, you can feel a whole day as a helicopter and airplane pilots. You will experience the complete course of a pilot assignment. From receipt of the order, route planning taking into account geographic and meteorological characteristics up to the implementation of a flight. Obviously, an experienced flight instructor is at your side and supports you in the practical implementation of the task.

Your day begins with a detailed briefing in a school. Here you will receive your flight order, which you will carry out together with your flight instructor during the day. These missions are planned carefully. Therefore, you will first develop a possible flight route. You have to take into account the current weather data as well as the local conditions. Once the route is up, you can get out to the airfield to your machine.

As no pilot is immediately behind the wheel, careful preliminary flight control is indispensable. You inspect your machine and check the respective functions of the helicopter and the aircraft. You will get to know the complex technology of a helicopter and aircraft at close range.

This experience is one of the most extraordinary experiences you have ever made. This is the stuff from which dreams are, helicopters and, if necessary, plane fly in a day! You will be swarming for a long time as you have mastered the king's discipline of flying. Welcome to a professional pilot's day.

Location Großbrembach - Price € 760,00
